SR. NO.	TITLE	PAGE NO.	FACULTY'S SIGN
1	Write a program to demonstrate example of hierarchical inheritance to get square and cube of a number.		
2	Create a base class Patient(pat-name, age, sex)and IPD(ward-no, bed-no, charge-per-day).Derive a class IPD-patient from these two base classes with no-of-days-admitted attribute to display information of patient who admitted more than five days		
3	Write a program that defines a shape class with a constructor that gives value to width and height. The define two sub-classes triangle and rectangle, that calculate the area of the shape area (). In the main, define two variables a triangle and a rectangle and then call the area() function in this two variables.		
4	Write a C++ program to get the information of student (rno, name, sub1,sub2,sub3) and make the result sheet of student as following format: Result Sheet <pre> ===== Roll No Name Subject1 Subject2 Subject3 Total Percentage Grade ===== 1 XYZ 85 85 85 250 85 A+ ===== </pre> Grade should be calculate as per following Criteria: percentage>=85 " A+ "percentage>=75 " A" percentage>=65 " B+" percentage>=55 " B" percentage>=35 "C" percentage< 35 "Fail" Program should implemented by class and Member function also create two class Student which get all information about student and Result which generate the result. Create object of array and display result of 5 students.		
5	Write a program to create class Person with data members (Name, Age). Create a class Employee inherited from Person with data members (eid, salary). Create a class Programmer inherited from Employee with no_ of _lang known. Show the Details of Programmer.		
6	Write a program which create default constructor, parameterized & copy constructor.		
7	Write a C++ program to demonstrate the concept of friend function.		
8	Write a C++ program to demonstrate the concept of virtual function.		
9	Create a menu driven program for push, pop, peep, update and display using stack.		
10	Create a menu driven program for insert, delete and display using simple queue.		
11	Create a menu driven program for insert, delete and display using Double Ended queue.		
12	Create a menu driven program for insert, delete and display using circular queue.
