Assignment-1&2

Submission date: 16-07-2026

Q.1 MCQ Questions

1. OOP stands for:

- A) Object Oriented Programming
- B) Objective Operating Program
- C) Operating Oriented Programming
- D) Object Operating Process

2. A class is:

- A) An instance of an object
- B) A blueprint for objects
- C) A function
- D) A variable

3. An object is:

- A) Blueprint of class
- B) Instance of a class
- C) Function
- D) Variable

4. Which access specifier allows access from anywhere?

- A) Private
- B) Protected
- C) Public
- D) Friend

5. Which function compares two strings?

- A) strcpy()
- B) strcmp()
- C) strlen()
- D) strrev()

6. Which operator is used for scope resolution in C++?

- A) .

- B) ->
- C) ::
- D) :

7. Which constructor takes no arguments?

- A) Copy Constructor
- B) Parameterized Constructor
- C) Default Constructor
- D) Destructor

8. Destructor is preceded by:

- A) !
- B) @
- C) ~
- D) #

9. Which keyword is used for inheritance in C++?

- A) extends
- B) inherit
- C) :
- D) implements

10. Data hiding is achieved using:

- A) Inheritance
- B) Encapsulation
- C) Polymorphism
- D) Overloading

11. Which keyword is used to define an enumeration?

- A) class
- B) enum
- C) struct
- D) union

12. A constructor is called:

- A) When object is destroyed
- B) When object is created
- C) During compilation
- D) During linking

13.Which type of inheritance has one child and multiple parents?

- A) Single
- B) Multilevel
- C) Multiple
- D) Hierarchical

14.Polymorphism means:

- A) Many Forms
- B) One Form
- C) No Form
- D) Multiple Classes

Q.2 Answer the following short questions:

1. Compare and POP.
2. Define class and object.
3. What is inheritance? Explain with example.
4. What is Constructor ? Explain copy Constructor.
5. Explain data abstraction and Encapsulation with an example.
6. Explain data abstraction and Encapsulation with an example.
7. Explain scope resolution operator.
